MHS GENESIS PATIENT PORTAL

Is the **preferred method** for informing the PRAP clinic of off-base medical care and should be done prior to returning to duty following a treatment or prescribed a NEW medication. The Utilization of this form is to promote members self-reporting & expedite the MTF's ability in passing notifications. **This does not replace the need to drop of the encounter notes to medical records or replace the members responsibility to self-report to their unit leadership!**

- Setting up Genesis Patient Portal is easy, takes 1-2 minutes to confirm account.
Go to <https://patientportal.mhsgenesis.health.mil> on a government computer to setup your account.
- Go to messaging and select send message.
 - o In the To box type: Type **Aviano** and then the clinic name
For example: *Aviano Optometry* or *Aviano Warrior PRAP_ (PCM NAME)*
 - o Type a brief subject/message and attach the front page of this form and send.
